

safe lift SCS CATERPILLAR SKATES

Model	Capacity tonnes	Weight kgs
SCS-20	20	50
SCS-30	30	58
SCS-60	60	92

Safelift Caterpillar Skates provide an economic and robust solution to many load moving and placement problems.

- Features include:**
- Carrying capacity of 20, 30 or 60 tonnes.
 - Professional build quality.
 - Modular concept allows linking of units.
 - Robust lockable steel container with nylon castors.

safe lift HTJ HYDRAULIC TOE JACKS

Model	Product code	Claw cap. kgs	Head cap. kgs	Toe height mm	Closed height mm	Stroke mm	Weight kgs
HTJ-3	4300006217	3000	3000	16	230	130	16.4
HTJ-6	4300006218	6000	6000	22	267	152	23.2
HTJ-10	4300006219	10000	10000	29	280	130	38.2

These Safelift hydraulic toe jacks are ideal when working in very confined spaces and they also have an extremely low toe height. Typical uses include lifting and positioning of heavy machinery, fabricated steel structures and general engineering applications. These jacks are ideal for use with a set of Safelift skates.

safe lift AJH/S ALUMINIUM JACKS

Aluminium jacks combine lightweight with high lifting capacity. The use of high tensile aluminium alloy allows lifting capacities of up to 100 tonnes resulting in a very favourable 1.8 tonnes lifting capacity per 1 kgs weight ratio.

Operation of Safelift hydraulic jacks is very simple. Jacks are supplied ready for use, i.e. including hydraulic oil, operating lever and, where applicable, carrying handle and lifting claw.

Model	Product code	Capacity tonnes	Max. capacity of lifting claw mm	Stroke mm	Closed height mm	Base plate dimensions mm	Min. height of lifting claw mm	Weight kgs
-------	--------------	-----------------	----------------------------------	-----------	------------------	--------------------------	--------------------------------	------------

Jacks with plain piston (standard type)
